PROFESSIONAL SUMMARY

Computer Science and Engineering undergraduate at APJ Abdul Kalam Technological University (KTU) with a CGPA of 9.14, passionate about software development and problem solving. Experienced in building full-stack web applications and AI-assisted projects through academic coursework and hackathons using Python, Flask and JavaScript. Eager to contribute strong analytical thinking, curiosity and a continuous learning mindset as a software engineering graduate.

EDUCATION

B.Tech in Computer Science and Engineering *Expected: June 2027*

College of Engineering Perumon — APJ Abdul Kalam Technological University (KTU) *CGPA (up to Sem 6): 9.14/10*

CBSE Class XII — PCMB *95% | School Topper*

TECHNICAL SKILLS

Languages: C, Java, Python, JavaScript, SQL

Web Technologies: HTML5, CSS3, Bootstrap, Flask, Jinja2

Databases: SQLite, SQLAlchemy

Tools: Git, GitHub, VS Code, Vercel, Render, Figma, Canva

Concepts: Object-Oriented Programming, Database Design, CRUD Operations, API Integration, Authentication

PROJECTS

idea2infra — AI-Powered System Architecture Generator *Python | Flask | JavaScript | Google Gemini API*

- Developed a full-stack AI platform that transforms software ideas into system architecture blueprints, including technology stack suggestions, database schema design, and infrastructure cost estimation.
- Integrated the Google Gemini API for architecture generation, with a custom fallback engine to keep the platform functional when the AI API is unreachable.
- Built PDF, PNG, and ZIP export features and deployed the frontend on Vercel and backend on Render.

GitHub: github.com/AshlyMaria98/tink-her-hack-temp

Elderly Care Assistant — Web Platform *Python | Flask | SQLite | Bootstrap | Jinja2*

- Developed a full-stack web platform for elderly users and remote guardians, with secure role-based login and a guardian-elder linking system.
- Implemented health tracking features including BMI calculation, medicine and appointment reminders, and daily mood logging.
- Built a one-click SOS emergency alert system and a guardian dashboard to monitor health records and notifications.

GitHub: github.com/AshlyMaria98/elderly-care-assistant

Hotel Management System — DBMS Project *Python | Flask | SQLAlchemy | SQLite | Bootstrap*

- Developed a database-driven hotel management system with role-based login for admin and staff.
- Implemented room booking, check-in/check-out, and billing management using SQLAlchemy ORM over a normalized SQLite schema.
- Applied core DBMS concepts — entity relationships, CRUD operations, and referential integrity — while collaborating using Git and GitHub.

GitHub: github.com/AshlyMaria98/hotel-management-system

HACKATHONS & CAMPUS ACTIVITIES

- Participated in TinkHerHack 2025 (Women's Hackathon) and developed idea2infra, an AI-powered software architecture generation platform.
- Participated in TinkHerHack 2024 and developed Excuse Generator, a frontend web application that generates humorous excuses.
- Member, Computer Society of India (CSI).
- Organized an online GIFception challenge as part of CSI activities.

CERTIFICATIONS

- NPTEL — Problem Solving Through Programming in C, Indian Institute of Technology (IIT)
- NPTEL — Deep Learning, IIT Kharagpur

ACHIEVEMENTS & ACADEMIC HIGHLIGHTS

- Academic Excellence Award (KTU) — awarded for SGPA above 9.0 in multiple consecutive semesters.
- CBSE School Topper — secured 95% in Class XII (PCMB), ranking first in school.

- Pursuing B.Tech Honours in Machine Learning.
