PROFESSIONAL SUMMARY

Computer Science and Engineering undergraduate at APJ Abdul Kalam Technological University (KTU) with a CGPA of 9.16. Experienced in developing full-stack web applications through academic projects and hackathons, using Python, Flask and database technologies. Possess a foundation in programming, object-oriented programming and database management, with an interest in software development and problem-solving. Willing to learn and eager to contribute to real-world, practical software engineering projects.

EDUCATION

B.Tech in Computer Science and Engineering *Expected: June 2027*
College of Engineering Perumon — APJ Abdul Kalam Technological University (KTU) *CGPA (up to Sem 6): 9.16/10*
Pursuing B.Tech Honours in Machine Learning.

CBSE Class XII — PCMB
Sree Narayana Guru Central School, Ezhukone *95% | School Topper*

TECHNICAL SKILLS

Programming Languages: C, Python, Java
Web Technologies: HTML5, CSS3, Bootstrap, Flask, Jinja2
Database Technologies: SQL, SQLite, SQLAlchemy
Tools: Git, GitHub, VS Code
Core Concepts: Object-Oriented Programming, DBMS, Data Structures, Operating Systems, Computer Networks
Soft Skills: Communication, Teamwork, Problem Solving, Adaptability, Time Management

PROJECTS

idea2infra — AI-Powered System Architecture Generator *Python | Flask | JavaScript | Google Gemini API*
- Developed a full-stack web application that converts a software idea into a system architecture blueprint, covering technology stack suggestions, database schema design and infrastructure cost estimation.
- Integrated the Google Gemini API for architecture generation and implemented a fallback mechanism to keep the application functional when the API is unreachable.
- Added PDF, PNG and ZIP export options; deployed the frontend on Vercel and the backend on Render.
  GitHub: github.com/AshlyMaria98/tink-her-hack-temp

Elderly Care Assistant — Web Platform *Python | Flask | SQLite | Bootstrap | Jinja2*
- Developed a Flask web platform for elderly users and remote guardians with role-based login and a guardian–elder linking system.
- Implemented health tracking (BMI calculation, daily mood logging) and medicine and appointment reminders.
- Built a one-click SOS emergency alert and a guardian dashboard to view health records and notifications, using SQLite database operations for data storage and retrieval.
  GitHub: github.com/AshlyMaria98/elderly-care-assistant

Hotel Management System — DBMS Project *Python | Flask | SQLAlchemy | SQLite | Bootstrap*
- Developed a database-driven hotel management system with role-based login for admin and staff.
- Implemented room booking, check-in/check-out and billing using SQLAlchemy ORM over a normalized SQLite schema.
- Applied DBMS concepts including CRUD operations, table relationships and referential integrity.
  GitHub: github.com/AshlyMaria98/hotel-management-system

HACKATHONS & CAMPUS ACTIVITIES

- Developed "idea2infra", an AI-powered software architecture generation platform, during TinkHerHack 2026.
- Developed "Excuse Generator", a frontend web application, during TinkHerHack 2025.
- Member, Computer Society of India (CSI).
- Organized and coordinated the online "GIFception" challenge under CSI, attracting over 100 registrations.

CERTIFICATIONS

- NPTEL — Problem Solving Through Programming in C, Indian Institute of Technology (IIT)
- NPTEL — Deep Learning, IIT Kharagpur

ACHIEVEMENTS & ACADEMIC HIGHLIGHTS

- Academic Excellence Award (KTU) — awarded for SGPA above 9.0 in multiple consecutive semesters.
- CBSE School Topper — secured 95% in Class XII, ranking first in school.
